

How IP Addresses Work

108.166.25.224 = www.ESQSites.com

An IP address is a string of identifying digits that direct computers to an exact location (a website) on a host server

Domain Name
ESQSites.com is easy to remember versus the Internet Protocol Address of 108.166.25.224

Domain Name System (DNS) DNS translates the Domain Name into its IP Address in order for the computer to find a website

IP Address
108.166.25.224 is assigned to ESQSites.com. These digits offer exact direction to our website at a specific location on our host server

IP Addresses are:
Fixed (tied to host server)
Unique
Not Intuitive
Not Geo- or Area- based

Look Up
If you type the IP Address of 108.166.25.224 into the URL bar, our www.ESQSites.com website will appear

Thank You, ESQSites.com
